

PlayStore Account Approval Requirements

To publish your Android mobile application on the Google Play Store, we need to create and verify your developer account. Kindly review and provide the following items so we can proceed with the account approval and app publishing process.

- Gmail account to be used for the Play Store developer account.
- Approval to pay the one-time Google Play developer registration fee (\$25)
- Company / Business name to display on the Play Store.
- **Business address for developer account verification (Google may require address verification)**
- Contact email address and phone number.
- Website URL (if available)
- Privacy Policy URL for the mobile application.
- App name and short description.
- App logo / icon (512 × 512)
- App screenshots (if available)
- Confirmation whether the app contains advertisements
- Email addresses for internal testing (if testing access is required)

Please note that Google may send a verification request for the business address or identity during the approval process, so the provided details should be accurate.

Once we receive the above information, we will proceed with the developer account setup, application configuration, and submission through the Google Play publishing system.
