

## **Ultra WhatsApp API Purchasing Requirements**

- 1- Client will pay **Rs. 10,000** per month to SHE against one mobile number.
- 2- Client need a SIM number for WhatsApp Registration.
- 3- The mobile number should be active in mobile device and register on Business WhatsApp app.
- 4- The number should not be for personal use or Golden number Because This is a third-party API and WhatsApp can BAN WhatsApp anytime if they feel we are using it for promotional/Marketing purposes.
- 5- After mobile number registered on Business WhatsApp once we need to scan WhatsApp QR Code on a portal.

**Note:** Once everything is done then we need 2 days to integrate WhatsApp API with our ERP.  
Best approach is to send 150-200 messages per day to avoid WhatsApp BAN.
